

IDRONECT is expanding and we are looking for

a **Full Stack Developer**

to join our dynamic team !

IDRONECT - The Drone Management Platform exists since 2015 and makes it easy to fly drones in a safe, legal and efficient way. Fun too by the way. We provide value to the entire drone ecosystem and connect drone professionals and enthusiasts. We are crossing borders and are expanding. That is why we need you !

As a Full-stack Javascript Ninja, you love to follow-up the latest and greatest trends in web development. Simplicity is one of your core values, and you're always looking to keep things simple, organised and modular. Code reviews are one of your favorite activities and you see them as an ideal way to improve and level-up as a team. You preach user experience and are constantly on the look-out on how to improve the interface for our customers missions.

If you are :

- Result-oriented and passionate
- Think about software development as an art
- Extremely curious and eager to learn
- In love with user feedback and optimising user experience
- automating your life from dusk till dawn and...
- Convinced that drones will rule the world,

Then read on !

At IDRONECT you will be doing the following cool stuff:

- Ideate, Build and Improve new kick-ass technology
- Automate everything that can be automated
- Collaborate with the entire worldwide organisation
- Assist the growth team to conquer new regions
- Prototype new features for our platforms
- Occasional travelling
- and the sky is not the limit !

Our ideal candidate:

- has experience in working in a lean startup environment and has a startup mindset
- has experience building web applications with React and Node.js
- is perfectly fluent in English
- believes code consistency and structure is more important than spelling
- has drone or aviation knowledge, is a (drone) pilot or aviation aficionado

But above you are curious, creative, social and willing to learn !

Some of the technologies we work with:

- **Languages:** primarily Modern JavaScript ES2021, experience with other languages like PHP, C++, Python, Java,... can be interesting as we encounter code in different languages from time to time
- **Frameworks:** React, React Native, Meteor, Express, Next, GraphQL, REST, Serverless,...
- **Tools/DevOps:** Git, Gitlab, ESLint, Prettier, Kubernetes, Docker, VSCode,,...
- **Data Storage:** MongoDB, SQL, ElasticSearch, JSON
- **Cloud Providers:** AWS, Digital Ocean, Google Cloud Platform, Netlify,...

We are offering

- Full time employment in an international, dynamic and growing industry
- A great and competitive salary package
- Fun and flexible working conditions
- A career path with growth potential

If you think you have what it takes and want to join the IDRONECT team then send us in the most expeditious and creative way your application **by email** to chris@idronect.com
